## WHO LET HENRY ESCAPE?

The Carson Appeal commenting upon the statement of H. H. Beck, as published in the JOURNAL, relative to James Henry, says "it is quite evident that some one is to blame for letting Henry escape and the blame should be definitely located." That the Appeal is right no honest man will dispute, but how is the blame to be located unless the matter is investigated? The facts are these, and if the Appeal can definitely locate the blame it is greatly to be hoped that it will do so:

H. H. Beck states that on the evening of March 22, 1895, he informed the Government officials that a man giving the name of James Henry had at various times brought granulated gold \$800 fine, and aggregating in value about \$22,000, to the Reno Reduction Works, and had it melted into bars, some of which were shipped by express to San Francisco and others of which were taken from the Works by Mr. Henry, that he, H. H. Beck, had that day, March 22, 1895, learned that the gold melted for Mr. Henry was similar to that refined at the mint, and that Henry had been employed at the mint, that the officers to whom he communicated this important information informed him that they knew Henry was then in San Francisco, yet for some cause to him and the public unknown, Henry was not arrested, and the last heard of him by the public was on April 2, 1895, when he appeared before a Notary Public and signed and acknowledged a power of attorney to his wife to dispose of the property held in his name.

Of course there are surmises as to the cause of Mr. Henry's escape, when Government detectives were swimming about Carson like flies around a hog-kissed keg, but surmises are sometimes unfounded. Mr. Henry held the key to the mint situation. Men who have been employed in the mint say it was impossible for him or any other individual to steal the metal without other employees knowing of the theft. If that is the fact Mr. Henry was doubtless assisted in effecting his escape as he evidently knew too much about operations in the mint for the comfort of those who assisted in the steal.

## THE JAPAN TREATY RATIFIED.

The Emperor of China has ratified the treaty of peace with Japan. Japan gets a money indemnity of \$100,000,000, Port Arthur and the island of Pongosa, and Corea its independence. Those terms are not satisfactory to Russia, and the Czar objects to the treaty and almost threatens to go to war with Japan for exacting such terms of China.

It would look bullying to outsiders to have Russia attempt to deprive Japan of the fruits of its victory over the Chinese, but Russia has been subjected to similar treatment. At the time of its last war with Turkey its armies crossed the Balkans, and coasts were intent on watering their horses in the Bosphorus. The Russians were on their way to Constantinople when an armistice was declared and the great powers dictated the terms upon which a settlement was effected at the Berlin conference. Now Russia wants to play the same game on Japan and compel it to accede to terms which will be entirely satisfactory to the Czar.

## THE BLUE AND THE GRAY.

It is announced in Washington that Mrs. Nellie Grant-Sartoris is to be married to General Henry K. Douglas. Mrs. Sartoris is the daughter of General Grant, and General Douglas served with distinction in the Confederate army. She is the daughter of the great Union General, and he made an excellent record as a Confederate General.

The union of the Blue and the Gray proves pretty conclusively that the war is over, and that probably some of General Grant's grandchildren, thirty or forty years hence, when candidates for office, will proclaim from the stump that while their father won his laurels in the Confederate army their grand father was twice elected President of the United States because he overcame that army and preserved the Union in its entirety.

## GOLDEN AGENTS.

The Denver News tells how the agents of the gold trust are operating in Colorado. It says gold receipts at the Denver Mint have fallen off heavily in the last month in spite of the increased production of the mines. There has been no increase in the receipts at the other mints and assay offices to account for the discrepancy. The mystery has been solved. The smelters have been selling their product to agents of Rothschilds and others interested in the recent bond sale, instead of placing it in the mints. The same agents have been purchasing larger retorts sent up from the principal gold mines, thus keeping a considerable quantity over and above the smelter product out of the mint. These facts are vouched for by men in a position to know what is occurring in the interior of Colorado.

The London papers desire an alliance for offensive and defensive purposes with the United States. England dictates our financial policy and our foreign policy and the next thing it will probably want is the annexation of the United States to Canada.

## Central Destruction of Life and Property.

SIoux CITY, Iowa, May 4.—Dispatches were received by the Sioux City & Northern Railway Company at 4:30 this afternoon from their agent at Sioux Center, forty-five miles northeast of here, telling of a terrible cyclone in which a number of people were killed and injured, and much property destroyed. Wires were blown down and telegraphic reports are consequently very meager.

The first dispatch said that the cyclone passed three miles northeast of there. The school houses near the town were destroyed, teachers were killed and a number of children lost their lives and were injured. The whole country in the path of the storm was devastated.

Dispatches from Sioux Center, at 4:30 p. m. say that three school houses and at least twenty residences and barns were swept away. At the school houses two teachers and three pupils were killed and many injured. Two women were found dead not far from the point where one of the school buildings stood. One man who arrived in Sioux Center late reported his horse blown away and his family killed. He himself escaped, and reports at least 200 or 300 people must have been killed.

Parties have been sent out from Hull to Sioux City and Orange City, neighboring towns, but their work, which is being carried on in total darkness and in the midst of a tremendous wind and rain storm, is progressing slowly. A number of bodies have already been recovered, although the exact number cannot be obtained. Perkins, a small town between Sioux Center and Doon, directly in the path of the storm, was almost entirely wiped out. Telegraph wires leading to it are all down.

SIoux CITY, Iowa, May 4.—It is estimated that the death toll in the terrible cyclone will reach two hundred. Iowa, South and North Dakota and Missouri have been swept by a cyclone. Churches, houses, barns and other buildings have been blown down in many towns. Orange City, Perkins, Doon, Hull, Sheldon, Ashton, Sibley and Lemars were directly in the path of the cyclone, which was followed by a furious rain storm continuing until this morning. Five school houses are known to have been demolished. Four teachers and a score of pupils were killed at each school-house. A curious feature of the cyclone was the accompaniment of electric violence. Many deaths by lightning are reported. A painful feature of the disaster is the number of children killed at or near schools.

Many children were carried a quarter to a half a mile before they were dropped. Two little daughters of John Kooser, a farmer of Sioux Center, were picked up when leaving the school-house and dashed against the wire fence. Both were killed. Two sons of C. H. Haggie at the same school-house had their legs broken and received other injuries from which they will die. Haggie's house is near the school, and although he escaped his daughter was so badly injured she cannot live.

The parents of many children escaped the storm and are nearly frantic with anxiety to learn whether their little ones are dead or alive. Numerous victims were found lodged in trees where they had been buried in the storm.

Where had stood fine residences could be found nothing but cellar holes, and in some cases a few twisted timbers, while strewn all over the ground were portions of buildings and furniture bearing not the least resemblance to their original form and useless except for kindling wood.

In South Dakota, even where there was severe destruction there appears to have been no real cyclone, with swirling, funnel-shaped clouds.

The Sioux county cyclone appears to have started near Ireton, and traveled northeast to a point on the Sioux City & Northern railroad, one and a half miles north of Sioux Center. Then it took the course of an elongated letter E, crossing the track twice, and for two miles it seems to have followed straight up the track until it struck the town of Perkins from the southeast. Those who saw it there believe it rose or was disrupted at that point, but it was possible that the same awful cloud continued its tortuous course and afterwards struck Sibley.

St. CHARLES, Ill., May 4.—The tail of the cyclone struck this place this afternoon. It blew the walls of deserted buildings over upon the Osgood block. The block was crushed. Miss Mattie Church was instantly killed. Two other people are under the ruins.

## AGAINST DURRANT

## A Jeweler to Whom He Tried to Sell Miss Lamont's Ring.

SAN FRANCISCO, May 4.—Adolph Oppenheim, the important witness in the Durrant case yesterday, said in an interview this morning that he is positive both as to the man and the ring offered him for sale. He says the defense cannot shake his testimony, as the ring has unmistakable peculiarities to a jeweler, and he could identify Durrant anywhere. Police Judge Conlan to-day signed a commitment transferring Durrant from the city prison to the county jail. Chief Crowley has granted Durrant's frequent appeals for the services of a barber, who will shave and trim the prisoner's hair of which he is vain.

## CLEVELAND REPUDIATED

## The Chicago Democratic Convention Declares for Free Coinage.

CHICAGO, May 4.—The County Democratic Convention held here to-day, preparatory to the Democratic State Convention to be held in June, developed into a hot anti-Cleveland gathering. The platform was denounced and repudiated amid wild applause of the delegates, who greeted every criticism of the Administration with enthusiasm. The platform adopted declared for the free and unlimited coinage of gold and silver at 16 to 1. A determined effort will be made to have the same platform adopted by the State Convention.

## The National Conventions.

SACRAMENTO, May 4.—Governor Budd has appointed W. W. Foote, W. H. Mills, E. L. Colton, General C. C. Allen, P. B. Cornwall and F. H. Gould a committee to secure the National conventions for San Francisco.

The Governor has also appointed General T. J. Clunie, A. L. Hart and Henry Langenour delegates to the Salt Lake Silver Convention.

## Accidentally Killed.

BORIS, Idaho, May 4.—Mrs. May Ham of Emmett was killed at Bernard's ferry, on Snake river, last night. With her husband and family she was going to Delamar. Arriving at the ferry, her husband undertook to drive on the boat, down a steep incline. Mrs. Ham was thrown out of the wagon and the wheels passed over her body, causing death in a few minutes.

## Two Lives Saved.

Mrs. Phoebe Thomas, of Junction City, Ill., was told by her doctors she had consumption and that there was no hope for her, but two bottles of Dr. King's New Discovery completely cured her, and she says it saved her life. Mr. Thos. Eggers, 139 Florida St. San Francisco, suffered from a dreadful cold, approaching consumption, tried without result everything else, then bought one bottle of Dr. King's New Discovery and in two weeks was cured. He is naturally thankful. It is such results, of which there are samples, that prove the wonderful efficacy of this remedy for coughs and colds. Free trial bottles at Hodgkinson's Drug Store. Regular size 50c. and \$1.

## A Gentleman

Who formerly resided in Connecticut, but who now resides in Honolulu, writes: "For 20 years past, my wife and I have used Ayer's Hair Vigor, and we attribute to it the dark hair which she and I now have, while hundreds of our acquaintances, ten or a dozen years younger than we, are either gray-headed, white, or bald. When asked how our hair has retained its color and fullness, we reply, 'By the use of Ayer's Hair Vigor—nothing else.'" "In 1868, my affianced wife was nearly bald, and the hair kept falling out every day. It induced her to use Ayer's Hair Vigor, and very soon, it not only checked any further loss of hair, but produced an entirely new growth, which has remained luxuriant and glossy to this day. I can recommend this preparation to all in need of a genuine hair-restorer. It is all that it is claimed to be."—Antonio Alarum, Bastrop, Tex.

## CARSON MINT SWEEPINGS.

The Discharged Employees—The Bullion Shipments Continued—Mason, Jones and Harris in San Francisco—Where's Honey?

(Correspondence of the JOURNAL.)

CARSON, May 4, 1895.

As stated in a previous communication, Superintendent Adams received an official letter of instructions from Washington last Monday, directing the discharge of quite a number of employees of the Carson Mint, said discharge to take effect to-day. So they finished out the week and quit this evening, permanently. The parties thus drafted are: Shepard, engineer; Kilday, fireman; Dellaplano, sweeper; Ted Dolan, Tom Connors and George Likens, refiners, and Ernest Harris, melter. These relieve the payroll seven and nine will soon follow. Three or five of the seven watermen will be let out as soon as the rest of the bullion and the \$6,000,000 in coin is shipped from the mint.

The discharge of Johnny Jones, late Assistant Melter and Refiner, on trial for the \$75,000 shortage, was a little more sudden and decisive. The first of the month being payday, all hands have to sign their receipt on the payroll to be forwarded to Washington. Johnny not calling around, he was sent for next day and \$32 tendered to him. He refused to take it, demanding his full month's pay—\$100. He acknowledged that he had been suspended, but not from the payroll. He was accused of the big mint shortage, but he would not have any shortage in his regular pay. His suspension document read "until further notice" and he had received no further notice. So they had to pay Johnny off in full, but his official dismissal was handed to him at once, not waiting till to-day. They seemed to think he had lots of gall for a man suspended on charge of robbing the mint, but he signed his receipt cheerfully.

Thursday and Friday evenings further shipments of bullion were made from the Carson Mint to the San Francisco Mint, but none went this evening. Thus it can be easily understood that the affairs of this mint are rapidly coming to some sort of an official Government wind up.

Inspector Mason will return from San Francisco on the 10th in time to attend the resumption of the Jones examination. He went to make a casual inspection of that mint, and probably had the roof sweepings assayed. Those sweepings used to pay big many years ago—the recent sweeping of the Carson Mint roof assayed nothing.

Detective Harris was reported a day or two ago to have gone to Mexico after Honey. If so, he follows a mighty cold trail. Honey is in South Africa—postoffice address, Johannesburg. Johnny Jones is enjoying the recess of his trial in San Francisco, and will bring Detective Harris back if he can find him.

## DELAMAR.

A Good Place to Stay Away From—P. Crotty, an old Humboldt miner, arrived this morning from Delamar, Lincoln county, where he went about two months ago in search of employment. He says the camp is overrun with men, most of whom cannot get work, haven't a dollar and are unable to get away. Delamar is situated on a desert which resembles the bed of an old lake, and is about 55 miles south of Pioche. Water is not found in less than 200 feet of the surface, and the limited supply used in running the company's mill is secured from springs. This lack of water is the greatest drawback to the camp and at present the mill is running at only half its capacity. The project of piping water from the Pahranagat valley, 35 miles away, is being considered, but of course it would necessitate the outlay of a large amount of money. There is very little money in circulation in the camp. The men are paid off in checks; and small aluminum coins, issued by the company, are used instead of silver currency. These pieces are stamped with their value and generally circulated in the camp as a medium of exchange. Mr. Crotty says that taking everything into consideration Delamar is the worst mining camp he ever saw in an experience of 30 years on this coast.

## District Court.

The arguments of attorneys in the case of Talbot vs. Rasmussen were heard yesterday morning and the case submitted to the jury. The jury was out about four hours and returned a verdict for plaintiff, assessing the damages at \$30, and plaintiff to pay costs of suit.

The will of Mary Ann Higgins was admitted to probate. James M. Higgins and Isaac T. Mason were appointed executors.

A partial distribution of the estate of James B. Webster, deceased, was ordered.

The case of Deluchio vs. Saturno was dismissed by agreement of parties to the suit.

## A Public Duty.

Seven men have been discharged from the Melter and Refiner's Department of the mint in compliance with orders from Washington. This, the Appeal says, is regarded as the beginning of what will come, and it is all because of thievery which was carried on under a Republican administration. The community at large suffers if the mint is closed down and every member of the community should assist in placing the Government in possession of all information which can be of use in locating and convicting the guilty parties.

## THE SHEEP LICENSE ACT.

The Author of the Bill Defends It. Assemblyman Flannigan explains the Sheep License act. He says on his motion a committee of two Senators and three members of the House was appointed to formulate a measure that would be satisfactory to all interests and the result is the sheep law, which requires the sheep owner to hold and own one acre of land for every two sheep. He emphatically denies that the bill was framed in the interest of any corporation, the object being that the Portuguese and Basque of California and the Mormon of Utah, shall not have the privileges of the resident stock owner without contributing one dollar to the support of the State. Mr. Flannigan also states that nine-tenths of the sheepmen of the State are satisfied with the law.

If, as Mr. Flannigan states, the sheepmen are satisfied with the law, as the cattlemen are said to be, then there can be no cause for complaint on either side. The JOURNAL has been informed, however, that some sheepmen and the railroad company formed a combination to pass the bill and that the company since its passage has leased several thousand acres of land to sheep owners, who are neither California Portuguese nor Utah Mormons, but hope to escape the payment of license by virtue of leasing the lands. As the owner of sheep must also own and hold one acre for every two sheep, leased lands, it seems, will not exempt them from the payment of license. The Virginia City papers say that a purse of \$10,000 has been raised by sheep owners to test the law, but if nine-tenths of them are satisfied with it there must be a mistake. What the JOURNAL said relative to the act it stated upon what it believed to be reliable authority, but its informants must be mistaken if Mr. Flannigan is not.

## The Party Last Night.

The complimentary party tendered the University cadets by Company C, N. N. G. last evening was a grand success. The armory was crowded with young people and the flashy uniforms of the guards and cadets, and the handsome dresses of the ladies made a brilliant effect. The dance went merrily on until midnight, and closed by each company giving three hearty cheers for the other.

## Arbor Day at Brown's.

At the school house an appropriate program was rendered by the pupils, teacher, patrons and others. Trees and shrubbery were planted on the grounds and trees were dedicated to several individuals. All present enjoyed the occasion and felt that Arbor Day was propitious for happy influences.

## Spring Medicine

Is a necessity because the tonic of winter air is gone, and milder weather, increased moisture, accumulated impurities in the blood and debilitated condition of the body, open the way for that tired feeling, nervous troubles, and other ills. The skin, mucous membrane and the various organs strive in vain to relieve the impure current of life. They all welcome

# Hood's Sarsaparilla

to assist Nature at this time when she most needs help, to purify the blood, tone and strengthen the laboring organs and build up the nerves.

"I was not able to wait on myself and could not gain any strength until I began taking Hood's Sarsaparilla about three months ago. Now I am doing my housework. My right lung was badly affected, and in the spring and summer I was very weak, but Hood's Sarsaparilla has done me much good and I have great confidence in it." Mrs. E. R. KNOX, Tecumseh, Okla.

# Purifies The Blood

## PALACE DRY GOODS AND CARPET HOUSE

—There's some mysterious magic in the words—

## "SPECIAL SALE!"

Judging by the number of times it is used outside of this store. The mere saying "Special Sale" doesn't make goods good or extra cheap, and often times an expensive lesson is the result. We can tell the merit and value of an article without newspaper letters two inches long, and its so in to-day's store news. A particular lot of bright, fresh things are considerably price-marked, but we are sorry the quantities can't be larger. Call soon and see them.
